AIMS AND SCOPE

Chemical Physics publishes experimental and theoretical papers on all aspects of chemical physics. Experimental papers are brought into relation with theory and theoretical papers demonstrate their relation to present or future experiments. More specifically, subject matter in the fields of spectroscopy and molecular structure, interacting systems, relaxation phenomena, fundamental problems in molecular reactivity, molecular quantum theory and statistical mechanics constitute the main areas of interest for this journal. In addition to regular issues, *Chemical Physics* publishes thematic issues containing invited articles by specialists in the relevant field.

(*continued from inside front cover*)

Submission of papers: All papers should be submitted in *quadruplicate* to one of the editors.

Electronic manuscripts: Electronic manuscripts have the advantage that there is no need for the rekeying of text, thereby avoiding the possibility of introducing errors and resulting in reliable and fast delivery of proofs.

For the initial submission of manuscripts for consideration, hardcopies are sufficient. For the processing of *accepted papers*, electronic versions are preferred. After *final acceptance*, your disk plus one final and exactly matching printed version should be submitted together. Double density (DD) or high density (HD) diskettes (3.5 or 5.25 inch) are acceptable. It is important that the file saved is in the native format of the wordprocessor program used. Label the disk with the name of the computer and wordprocessing package used, your name, and the name of the file on the disk.

Important: please adhere to instructions to authors, to be found on the last pages of each volume. The instructions can also be found on the Web: access under http://www.elsevier.com.

Proofs and reprints: Authors will receive **proofs**, which they are requested to correct and return as soon as possible. No new material may be inserted in the text at the time of proofreading. A total of **50 reprints** of each paper will be supplied free of charge to the author(s). Additional reprints can be ordered at prices shown on the reprint order form.

For enquiries relating to the status of accepted articles through our Online Article Status Information System (OASIS), author Frequently Asked Questions and any other enquiries relating to Elsevier Science, please consult http://www.elsevier.com/locate/authors/

Contact details for questions arising after acceptance of an article, especially those relating to proofs, are provided when an article is accepted for publication.

Authors in Japan please note: Upon request, Elsevier Science K.K. will provide authors with a list of people who can check and improve the English of their paper (*before submission*). Please contact our Tokyo office: Elsevier Science K.K., 9-15 Highashi-Azabu 1-chome Minato-ku, Tokyo 106-0044, Tel. (03)-5561-5032; Fax (03)-5561-5045.
